### ABOUT ME

Hi, I'm Pramodh, passionate about frontend development.

With **10** years of experience in software development field, through constant practice & learning, I enjoy implementing the design prototypes into interactive, responsive & progressively enhanced web application.

I have worked with wide variety of javascript frameworks/libraries like **React, Angular JS, ExtJS** along with **Typescript, SCSS, bootstrap** to top it off.

I have the experience of working with Health care, automotive and Web3 domains.

I have the experience of working with & leading large teams (~25), small team (3) & currently working in a completely remote set up.

I am thoroughly a team player and a quick learner.

I want to be involved with ambitious & curious people, learn best practices from each other and eventually bring value to the company.

With my ability to quickly adapt to the work culture , bundle of energy from a startup atmosphere and attention to detail, I strongly believe I would be an asset to your company.
