Summary

* With close to 10 years of experience in software development field, through constant practice & learning, I enjoy implementing the design prototypes into interactive, responsive & progressively enhanced web application.

* I have worked with wide variety of javascript frameworks/ libraries like React, AngularJS, ExtJS along with Typescript, SCSS, bootstrap to top it off.

* I have the experience of working with variety of domains ranging from Health care, automotive and the newest NFTs, blockchain & crypto.

* I have the experience of working with and leading large teams (~25), small team (3) & currently working in a completely remote set up.

* I am thoroughly a team player and a quick learner.

* I want to be involved with ambitious & curious people, learn best practices from each other and eventually bring value to the company.

With my ability to quickly adapt to the work culture, bundle of energy from a startup atmosphere and attention to detail, I strongly believe I would be an asset to your company.

Experience

Frontend Engineer
pink.gg
Oct 2021 - Present (1 year 2 months +)
* Worked closely with the product management team and the design team and implemented the design prototypes into responsive, scalable & progressively enhanced web application.

* Worked closely as a team to create reusable components. The technology stack we use is React, Typescript, Bootstrap, SCSS, Webpack, Jest

* Successfully managed to build & ship features in a completely remote set up.

* Continuously enhance the web application with new features, improved Quality of Life for developers by writing reusable code, resolved numerous bugs.

Full Stack Engineer
NTT DATA Services
Oct 2012 - May 2019 (6 years 8 months)
